## AMENDMENTS TO THE CLAIMS

1.      (ORIGINAL)  A method for determining commission using a computer system comprising:

        obtaining one or more transactions;

        obtaining one or more quotas that specify one or more levels;

        obtaining one or more promotions that specify a reward for one or more of said levels;

        calculating a performance of a recipient based on said transactions;

        determining if said recipient's performance qualifies for said promotion; and

        determining compensation for said recipient using said promotion if said recipient's performance qualifies.

2. – 44.    (CANCELLED)
